

IN THE SPECIFICATION

- (1) Delete the paragraph on page 2, lines 26-29 and replace it with the following paragraph:

C2 Still another embodiment of the invention provides a temperature sensitive plasmid. The plasmid replicates at 30 °C but not at 40 °C in *P. haemolytica*. Moreover, it is of the same incompatibility group as the plasmid which has been deposited at the ATCC with Accession No. 98895 Accession No. _____.

- C3 (2) Delete the paragraph on page 4, lines 19-23 and replace it with the following paragraph: /

Also provided by the present invention is a temperature sensitive plasmid which replicates at 30 °C but not at 40 °C in *P. haemolytica*. Preferably the plasmid is of the same incompatibility group as pD80, i.e., it shares the same origin of replication. One such plasmid has been deposited at the ATCC with Accession No. 98895 Accession No. _____.
